

ExeVision's iPD Solution

Road & Bridge Project Development

The integrated Project Development (iPD) solution is a comprehensive project management system, fully integrating all functional aspects of preconstruction, construction management, and civil rights for road and bridge building. iPD is designed to carefully manage infrastructure projects for state and city departments of transportation and federal government agencies, seamlessly integrating end-to-end project management control. This includes the advantage of entering data once and only once, and then making that data available to all stakeholders.

Governor's CIO Award *Outstanding Online Application*

As UDOT's partner in the development of this solution, the dedicated ExeVision/UDOT team created UDOT's Electronic Bid System for Contractors and received the Governor's 2004 CIO Award for "Outstanding Online Application - Doing Business with Government". UDOT also received national recognition from the National Transportation Research Board, "Best Practice - UDOT's Electronic Bid System".

UDOT's former team lead for the Project Development Business System (PDBS) project, Blaine Bailey, is now ExeVision's subject matter expert (SME) for the iPD solution, providing 39 years of experience in infrastructure project management and project management systems.

Best Practices Award *Transportation Research Board - National Cooperative Highway Research Program (NCHRP)*

The Transportation Research Board (TRB) administers a number of major research programs sponsored by other organizations. The oldest and largest of these programs, the National Cooperative Highway Research Program (NCHRP), is sponsored by the state transportation departments in cooperation with the Federal Highway Administration.

NCHRP's "Synthesis of Highway Practice" series, reports on current knowledge and practice. In the "Best Practices Report", project number 20-24(19) for State DOTs and e-Business which was published by Booz Allen Hamilton, UDOT was awarded the Best Practices award for the Electronic Bid System (EBS) created by UDOT and ExeVision as a part of the Project Development Business System (PDBS).
